

ADPICS 1900 ENHANCED TRAVEL A VOUCHER HEADER ENTRY SCREEN EDIT CHANGES

A modification will be made to the edits on the ADPICS 1900 Travel Voucher Header Entry Screen on June 18, 1998. The edits will be changed so that the "open advance indicator" field looks for open advances for a specific vendor by FACS agency (3-digit) instead of by ADPICS department (8-digit).

Additionally, the "Travel Auth/Adv ID" field edits will look for advances for a specific vendor based on the user's ADPICS department authorization security instead of the 8-digit ADPICS department in which the voucher was entered. This change was made for agencies that wish to enter vouchers in one ADPICS department and advances in a different ADPICS department.
